THE 1975 INTERNATIONAL CODE will be an essential reference work for all bacteriologists, representing as it does a landmark in the naming of bacteria.

New requirements for the valid publication of names come into force with the publication of this Code. It gives a glimpse into the future of nomenclature, and outlines the rules under which it is proposed that bacteriological nomenclature will be based on a sound and scientific footing. All scientists interested in the radical solution to the problem of disused names will find the Code indispensable.
