APPLIED AND ENVIRONMENTAL MICROBIOLOGY

Volume 34  Contents for November 1977  Number 5

Metabolism, Growth, and Industrial Microbiology
L-Histidine Production by Histidase-Less Regulatory Mutants of Serratia marcescens Constructed by Transduction.  Masahiko Kisumi,* Noriyuki Nakani-shi, Tsutomu Takagi, and Ichiro Chibata ........................................... 465

Anaerobic and Aerobic Hydrogen Gas Formation by the Blue-Green Alga Anaebaena cylindrica.  Arlene Daday, Rosalea A. Platz, and Geoffrey D. Smith* ................................................................. 478

Uptake and Incorporation of Glucose and Mannose by Whole Cells of Bacteroides thetaiotaomicron.  P. B. Hylemon,* J. L. Young, R. F. Roadcap, and P. V. Phibbs, Jr. .......................................................... 488

Degradation of the Plant Flavonoid Phellamurin by Aspergillus niger.  Saeiko Sakai* .................................................................................................................. 500

Isolation and Characterization of Human Fecal Bacteria Capable of 21-Dehydroxylating Corticoids.  V. D. Bokkenheuser,* J. Winter, P. Dehazy, and W. G. Kelly .... 571

Alkaline Phosphatase Activity of Rumen Bacteria.  K.-J. Cheng* and J. W. Costerton .................................................................................................................. 586

Agar Plate Screening Procedure for Cyclic Adenosine 3',5'-Monophosphate and Inhibitors of Cyclic Nucleotide Phosphodiesterase.  P. J. Somers* and C. E. Higgens ................................................................. 604

Stimulation of the Growth and Respiration of a Methylotrophic Bacterium by Morphine.  J. Romeo, M. Scheraga, and W. W. Umbreit* ........................................ 611

Food Microbiology and Toxicology
Double-Antibody Solid-Phase Enzyme Immunoassay for the Detection of Staphylococcal Enterotoxin A.  George C. Saunders* and Mary L. Bartlett .... 518

Comparative Dose-Survival Curves of Representative Clostridium botulinum Type F Spores with Type A and B Spores.  Abe Anellis* and D. Berkowitz ........ 600

Salmonellae in Health Foods.  Berenice M. Thomason,* William B. Cherry, and David J. Dodd ................................................................. 602

Mycotoxins
Emetic and Refusal Activity of Deoxynivalenol to Swine.  D. M. Forsyth,* T. Yoshizawa, N. Morooka, and J. Tuite ................................................................. 547

Penicillic Acid Production in Submerged Culture.  L. A. Lindenhfelser and A. Ciegler ........................................................................................................... 553

Epichloë typhi From Toxie Tall Fescue Grasses.  C. W. Bacon,* J. K. Porter, J. D. Robbins, and L. S. Luttrell ................................................................. 576

Continued on following page
Applied Environmental and Public Health Microbiology

Animal Fecal Carriership and Biotypes of Staphylococcus aureus. G. Dimitracopoulos,* H. Kalkani-Boussiakou, and J. Papavassiliou ................. 461

Comparative Statistical Study of the Cornwall, LKB, and Micromedic Dispensers. J. M. Barberee,* J. A. Habas, P. H. Rossing, and J. F. Dobbins 484

High-Viability Lyophilized Bacille Calmette-Guérin Vaccine Produced by Deep-Culture Technique. Thomas H. Kim ........................................ 495

Effect of an Activated Carbon Filter on the Microbial Quality of Water. J. V. Fiore* and R. A. Babineau .................................................. 541

Colonization of the Botanical Environment by Klebsiella Isolates of Pathogenic Origin. Martin D. Knittel, Ramon J. Seidler,* Chris Eby, and Linda M. Cabe .............................................................. 557

Inactivation of Enteric Viruses in Wastewater Sludge Through Dewatering by Evaporation. Richard L. Ward* and Carol S. Ashley ................. 564

General Microbial Ecology

Nitrification in the Intertidal Zone: Influence of Effluent Type and Effect of Tannin on Nitrifiers. B. Ben Bohlool, E. L. Schmidt,* and Cilla Beasley 523

Fermentation of Mucins and Plant Polysaccharides by Anaerobic Bacteria from the Human Colon. Abigail A. Salyers,* Susan E. H. West, John R. Vercellotti, and Tracy D. Wilkins ................................................... 529

Role of Estrogen in Controlling the Genital Microflora of Female Rats. Bryan Larsen,* A. J. Markovetz, and R. P. Galask ............................ 534

Methods

Rapid Identification and Quantitation of Small Numbers of Microorganisms by a Chemiluminescent Immunoreaction. Mirjam Halmann,* Baruch Velan, and Tamar Sery ................................................................. 473

Erratum

Fungal Growth on C1 Compounds: Quantitative Aspects of Growth of a Methanol-Utilizing Strain of Trichoderma lignorum in Batch Culture. Rowena Tye and Andrew Willetts ......... 615

* Asterisk refers to person to whom inquiries regarding the paper should be addressed.
