

## HOW TO . . . TRACK DOWN THE TRESPASSER APPREHEND THE CULPRIT INTERCEPT THE INTRUDER

By running the four PathoTec test papers together, you can presumptively identify certain of the most common gram-negative bacteria. With each of the PathoTec test papers, you get reliability plus . . .  **stability** (for instance, cytochrome oxidase reagent stable indefinitely when refrigerated)  **convenience** (no reagent preparation, no waste, easy storage, easy disposal)  **rapidity** (for instance, the PD reaction can be read within 10 minutes as compared to the usual 4-24 hours)  **reproducibility** (all PathoTec test papers are manufactured to rigid standards; results are uniformly reproducible)

# COTTONSEED NUTRIENTS

GIVE YOU THESE ADVANTAGES:

## INCREASED YIELDS

DEPHOSPHORATED PHOSPHATE AND POTASSIUM SULFATE are essential nutrients for cottonseed plants. They are available in the form of a highly soluble nutrient.

These nutrients are available in a highly soluble form. They are available in a highly soluble form. They are available in a highly soluble form.

## EXCELLENT SCREENING NUTRIENTS

These nutrients are available in a highly soluble form.

These nutrients are available in a highly soluble form.
