

# NEW SAFEGUARDS FOR THE LABORATORY

*Stainless steel enclosures for handling hazardous substances*

## ▲ MICRO-BIOLOGICAL SAFETY CABINET

with micro-biological filter canister

● Filter canister may be back or top-mounted. Cabinet equipped with fluorescent lamps, 115 volt de-territe filter, service connections, electrical panel box with switches. Safety glass viewing window hinged to sloping front. Available in either 60" or 48" lengths. Other sizes, if desired. Air Lock and stand optional. For complete description, send for Bulletin A-6.

## ► BIOLOGICAL ENCLOSURE ►

with refrigerated centrifuge and micro-biological filter canister

● Centrifuge is built-in mounted, filter canister either back or top-mounted. Access openings at either end. Interior of hood has approximately ten square feet working space. Cup sink at bottom of hood. Unit equipped with UV and fluorescent filter, service for electricity, hot and cold water and three additional connections. Send for Bulletin A-7.

Standard units available, or we fabricate to your specifications. Ask us about other types of equipment in which you are interested.

SAFETY is the prime factor in this newly-designed special-purpose equipment. These two enclosures make it easier and safer for the laboratory technician to work with contaminants, infected animals and micro-organisms, toxic chemicals, poisonous and radioactive substances and live viruses. Stainless steel construction features crevice-free surfaces and rounded corners for ease of cleaning and decontamination.

# MYCOLOGY

## DIAGNOSTIC

. . . for the isolation, identification and cultivation of pathogenic fungi. These media are also widely used in phytopathological studies. Several are neutral in reaction, giving optimum conditions for growth of a variety of fungi. The following may be prepared as selective media by the adjustment of reaction, addition of antibiotics or other agents:

- |                                 |                                    |
|---------------------------------|------------------------------------|
| Bacto-Brain Heart Infusion Agar | Bacto-Mycological Agar             |
| Bacto-Sabouraud Dextrose Agar   | Bacto-Mycological Broth            |
| Bacto-Sabouraud Maltose Agar    | Bacto-Corn Meal Agar               |
| Bacto-Littman Oxgall Agar       | Bacto-Corn Meal Agar with Dextrose |
| Bacto-Bean Pod Agar             | Bacto-Prune Agar                   |
|                                 | Bacto-Lima Bean Agar               |

## CONTROL

. . . for sanitary and sterility procedures as well as for general use in mycological procedures:

- |                               |                                |
|-------------------------------|--------------------------------|
| Bacto-Sabouraud Maltose Broth | Bacto-Neurospora Culture Agar  |
| Bacto-Sabouraud Liquid Medium | Bacto-Potato Dextrose Agar     |
| Bacto-Malt Extract            | Bacto-Mildew Test Medium       |
| Bacto-Malt Agar               | Bacto-W.L. Nutrient Medium     |
|                               | Bacto-W.L. Differential Medium |

## CLASSIFICATION

. . . and nutritional studies of fungi:

- |                             |                               |
|-----------------------------|-------------------------------|
| Bacto-Yeast Morphology Agar | Bacto-Czapek Dox Broth        |
| Bacto-Yeast Carbon Base     | Bacto-Czapek Solution Agar    |
| Bacto-Yeast Nitrogen Base   | Bacto-Vitamin Free Yeast Base |
