

## Advanced Biotechnology Products

### CELL CULTURE SYSTEMS

LSL Biolafitte meet the growing demand for cultivation of cells in suspension or on microcarriers with a full range of specially designed cell culture systems.

With optimized vessel geometry and a low speed, low shear agitation system to maintain homogeneity of suspended material, these systems offer substantial improvements over other techniques for mammalian and plant cell culture.

For more efficient use of substrate, precise monitoring and control of all operating parameters and effective system sterilization, this high quality, well engineered equipment is easy to operate and guarantees good yields.

The full range offers a choice of 8 vessel sizes from 2 liters to 540 liters, each incorporating low carbon 316L stainless steel components, highly polished to ensure system sterility.

Whether the application is at bench, pilot or production scale, it is within our capacity.

Meeting the bacteriologist's need for a compact handbook of laboratory methods—

# Manual of Methods for General Bacteriology

EDITOR-IN-CHIEF:  
Philipp Gerhardt

SECTION EDITORS:  
Ralph N. Costilow  
Noel R. Krieg  
R. G. E. Murray  
Eugene W. Nester  
G. Briggs Phillips  
Willis A. Wood

Published and distributed  
by:

American Society  
for Microbiology  
1913 I Street, NW  
Washington, DC 20006

This *Manual* covers all the taxa of bacteria, and its approach is generalized for both pure and applied bacteriology. Aimed at senior undergraduate and beginning graduate science majors, at teachers and researchers, the *Manual* provides practical descriptions of laboratory procedures that are known to be reliable and that are in frequent use. It is an invaluable tool for all involved in bacteriology in the laboratory setting.

The book comprises six sections, each of which is self-contained, with its own table of contents to help the reader find specific methods as easily as possible. The contents are listed below.

## METHODOLOGY FOR GENERAL BACTERIOLOGY

**MORPHOLOGY**—Light Microscopy—Specimen Preparation for Light Microscopy—Determinative Methods of Light Microscopy—Electron Microscopy—Cell Fractionation

**GROWTH**—Biophysical Factors in Growth—Biochemical Factors in Growth—Enrichment and Isolation—Solid Culture—Liquid Culture—Growth Measurement—Preservation

**GENETICS**—Gene Mutation—Gene Transfer—Plasmids

**METABOLISM**—Physical Methods—Chemical Composition—Enzymatic Activity—Permeability and Transport

**SYSTEMATICS**—General Characterization—Numerical Taxonomy—Genetic Characterization

**LABORATORY SAFETY**—Sterilization—Containment and Disinfection

**ADDENDUM**—Diluents and Biomass Measurement

## ORDERING INFORMATION

Publication date: March 1981. 525 pages, fully illustrated.

Clothbound

Flexible binding:

ISBN: 0-914826-29-8

ISBN: 0-914826-30-1

\$30.00 (\$22.00 to members of ASM) \$26.00 (\$19.00 to members of ASM)

State-of-the-art technology in clinical microbiology

# **RAPID METHODS and AUTOMATION in Microbiology**

**EDITOR:** Richard C. Tilton

This new collection of research papers on a topic of increasing and critical interest promises to be of real assistance to clinical microbiologists, clinical pathologists, immunologists, medical technologists, and others who are caught up in the rapidly changing environment of microbiology. The speed of publication lends added utility to this survey of technologically advanced—and advancing—methods and procedures. The book, indeed, captures some of the excitement that was in the air at the meeting in May 1981 on which this volume is based: the Third International Symposium on Rapid Methods and Automation in Microbiology.

---

As the keynote seminar of the symposium suggested, topics of particular concern include systems approaches, evaluation, and the future of diagnostic systems in microbiology. The book fully develops the following areas:

- Computer Systems in Clinical Microbiology
- Rapid Detection of Microorganisms in Body Fluids
- Hydrophobic Grid-Membrane Microbiology
- Rapid Reporting in Microbiology
- Immunological Diagnosis of Infectious Diseases
- Chromatographic Analysis: a New Future for Clinical Microbiology
- Rapid Detection of Microorganisms in Urine
- Rapid Methods in Food Microbiology
- Systems Approaches to Diagnostic Microbiology
- Rapid Identification of Viral, Chlamydial, and Mycoplasmal Agents
- Rapid Identification of Clinically Important Anaerobes
- Applications of the Autobac System
- Clinical and Research Applications of the MS-2 System
- Nonautomated Rapid Methods in Microbiology

---

**ORDERING INFORMATION:**

February 1982. 361 pages. Clothbound. \$33.00. ISBN: 0-914826-38-7

Price subject to change without notice.

---

The latest volume in ASM's  
annual **Microbiology** series:

# Microbiology— 1983

**Editor:**  
**David Schlessinger**

This volume covers a variety of topics:

- I. Termination, Antitermination, and Processing of Bacterial mRNA
- II. Genetic Control of DNA Replication of Phages and Their Hosts
- III. Impact of Genetics on the Systematics of Microorganisms
- IV. Metabolism of C<sub>1</sub> Compounds
- V. Developmental Biology of Bacteria
- VI. Mycology
- VII. Infectious Diseases
  - A. Iron and Trace Metals: Transport, Metabolism, and Disease
  - B. Obligate Intracellular Parasitism
- VIII. Short Reviews

Researchers in these areas, departmental and university libraries, and graduate students with a particular interest in any of these topics will find this volume useful.

**Also Available:** Previous volumes in the **Microbiology** series are still available. The more recent are **Microbiology—1982**, **Microbiology—1981**, and **Microbiology—1980**, but the series goes back to **Microbiology—1974**. Volumes prior to the 1983 volume are priced at \$25.00 for nonmembers, \$15.00 for ASM members. **Microbiology—1983** is priced at \$27.00 for nonmembers, \$17.00 for ASM members. It contains 412 pages and is clothbound. Publication date: May 1983.  
ISBN: 0-914826-53-0.  
Prices are subject to change without notice. Member orders must be prepaid. All orders must be paid in US dollars. Send orders and inquiries to the publisher:

**PRESENTING THE NEW  
SERIES 100 FROM AO.**

Exciting new optics achieve a startling clarity. Sharper. Crisper. More vividly defined.

Improved illumination provides an acutely brilliant view, snappier at all magnifications.

And a more cost-effective manufacturing technique enables AO to deliver the SERIES 100 at a surprisingly economical price — another American idea.

See for yourself. Ask your AO dealer or representative for a personal viewing, or write for our brochure:
