
APPLIED MICROBIOLOGY

Published under the sponsorship of The Society of American Bacteriologists

EDITORIAL BOARD

Editor

H. B. WOODRUFF, Microbiological Research Department, Merck & Co., Inc., Rahway, N. J.

Editorial Assistants

MARY ANN REAGAN
BRINTON M. MILLER

Term 1953-1957

T. C. CORDON
Eastern Utilization Research and
Development Division, U.S.D.A.

J. W. FOSTER
Department of Bacteriology
University of Texas

GLADYS L. HOBBY
Chas. Pfizer & Co., Inc.

FREEMAN A. WEISS
American Type Culture Collection

CARL E. GEORGI
Department of Bacteriology
University of Nebraska

J. M. VAN LANEN
Research Department
Hiram Walker and Sons, Inc.

Term 1956-1958

DOROTHY I. FENNELL
Quartermaster Research and Development
Center
Natick, Massachusetts

W. L. MALLMANN
Department of Microbiology
and Public Health
Michigan State University

J. J. GAVIN
Norristown State Hospital
Norristown, Pennsylvania

R. L. STEDMAN
Eastern Utilization Research and
Development Division, U.S.D.A.

EDWIN L. SCHMIDT
Departments of Bacteriology
and Immunology, and Soils
University of Minnesota

PAUL F. KLENS
Nuodex Products Co., Inc.

Term 1957-1959

A. C. BLACKWOOD
Macdonald College
McGill University

JOHN C. AYRES
Department of Dairy and
Food Technology
Iowa State College

E. R. L. GAUGHAN
Johnson & Johnson

J. L. STOKES
Western Utilization Research and
Development Division, U.S.D.A.

F. S. ORCUTT
Biology Department
Virginia Polytechnic Institute

H. W. SCHOENLEIN
Difeo Laboratories

Subject Index

- Actinomycin formation by *Streptomyces* cultures, 95
Actinophage, electron microscope study of, affecting *Streptomyces griseus*, 9
Aeration of *Bacillus anthracis* in submerged fermentation, 229
Aerial viability of *Serratia marcescens* variants, 131
Aerobic processes of microorganisms in organic waste disposal, 167
Aerobic propagation of *Serratia marcescens*, 308
Aerosols, bacterial, nature and composition of, 1
Aerosols, critical-orifice liquid impinger for bacterial, 119
Algae, anaerobic digestion of, 47
Alkalis, glycerol formation in the presence of, 216
Amino acids, dialysis cell determination of, 160
Amino acids, effect of, on cucumber fermentation, 253
Amino acids, incorporation of inorganic sulfate into, by rumen microorganisms, 360
Anaerobic bacterial spores, lethality of catalase and cobalt⁶⁰ radiation on, 366
Anaerobic decomposition of waste solids, 175
Anaerobic digestion of algae, 47
Analytical microbiology, diffusion methods in, 25
Analytical microbiology, turbidimetric methods, 235
Animals, flexible film apparatus for the rearing and use of, 406
Antibiotic treatment of crab and oyster meats, 368
Antibiotics, effect of some, on oral lactobacilli, 82
Antibiotics in poultry meat preservation, 331
Antibiotics, stability of, in honey and sugar syrup, 152
Apple juice preservation with sorbic acid, 41
Aspergillus, use of heterokaryons of, in commercial fermentations, 106
Assay of thiamine with *Lactobacillus fermenti*, medium for, 249
Aterrimin, multiple factor experimentation of biosynthetic yield of, 124
Azotobacter cultures studied by fluorimeter, 103
- Bacillus anthracis*, aeration of, in submerged fermentation, 229
Bacillus coagulans, nonlogarithmic rate of thermal destruction of spores of, 243
Bacillus megaterium spores, membrane filter technique in radiation studies of, 61
Bacillus subtilis var. *niger* spores, rapid heat treatment of, 193
Bacteria, destruction of, in diluents, 21
Bacteria, suspension stability of, 145
Bacterial aerosols, critical-orifice liquid impinger as sampler for, 119
Bacterial aerosols, nature and composition of, 1
Bacterial assimilation of cystine, effect of glucose and heat sterilization on, 65
Bacterial fractionation of sulfur isotopes, 111
Bacterial mass, determining, with total phosphorus, 14
Bactericidal wash, Clorpactin as a, for crab and oyster meats, 137
Bacteriology, comparative, of *Hevea* Latex and its derivatives, 349
Bacteriotoxicity in autoclaved media containing glucose and phosphate, 74
Basidiomycetes, physiology of wood-rotting, 87
Beef, action of chlortetracycline in the preservation of, 400
Beef inoculated with spores of *Clostridium botulinum*, 292
Bio-calculations of activity of microorganisms in waste disposal, 180
Biosynthetic penicillins, factors influencing production of, 386
- Boric acid lactose broth for detection of coliform bacteria, 80
Boric acid lactose broth reaction of coliform IMViC types, 396
- Canned foods, combined irradiation and heat processing of, 292
Carbon dioxide evolution from strip mine spoils, 17
Catalase and lethality of cobalt⁶⁰ for anaerobic bacterial spores, 366
Chick as a test animal in assay of diphtheria toxoids, 286
Chicken meat, fungi in spoiled chlortetracycline treated, 319
Chlortetracycline, action of, in the preservation of beef, 400
Chlortetracycline, fungi in spoiled chicken meat treated with, 319
Citrus fruit decay, control of, with 1-piperidino-2-phenyl-3-butanone hydrochloride, 303
Clorpactin WCS-50 as a bactericidal wash for crab and oyster meats, 137
Clostridium botulinum, beef inoculated with spores of, 292
Cobalt⁶⁰ gamma radiation and catalase, effect of, on anaerobic bacterial spores, 366
Coliform bacteria, boric acid lactose broth for detection of, 80
Coliform IMViC types, boric acid lactose broth reaction of, 396
Coliforms, fermentation tube and membrane filter techniques for, in sea water, 141
Continuous freeze drier for laboratory studies, 323
Continuous sampling of *Serratia marcescens* using a slit sampler, 321
Corn steep liquor, effect of, on cucumber fermentation, 253
Crab meat, antibiotic treatment of, 368
Crab meat, Clorpactin as a bactericidal wash for, 137
Critical-orifice liquid impinger for bacterial aerosols, 119
Cucumber fermentation, effect of sugar, amino acids and corn steep liquor on, 253
Cucumber fermentation, sorbic acid in, 373
Cystine degradation and bacteriotoxicity of peptones, 70
Cystine, effect of glucose and heat sterilization on bacterial assimilation of, 65
- Dialysis cell, microbiological determination of vitamins and amino acids using, 160
Diffusion methods in analytical microbiology, 25
Diluents, elimination of destruction of bacteria in, 21
Diphtheria toxoids, chick as test animal for, 286
Disinfectant activity in hard water, 34
- Electron microscope study of actinophage affecting *Streptomyces griseus*, 9
Electronic foam controller for fermentors, 44
Enteric pathogen characterization using paper discs, 36
Enterobacteriaceae, enumeration of lactose negative and positive, in foods, 379
Enterococci in frozen orange concentrate, 300
- Fecal bacteria, boric acid lactose broth for detection of, 80
Fermentation, aeration of *Bacillus anthracis* in submerged, 229
Fermentation, cucumber, effect of sugar, amino acids and corn steep liquor on, 253
Fermentation media, calculation of heat sterilization times for, 221
Fermentation processes leading to glycerol, 197, 211, 216
Fermentation tube method for estimating coliforms in sea water, 141

- Fermentors, electronic foam controller for, 44
 Flexible film apparatus for the rearing and use of germfree animals, 406
 Flor yeast, nutrient requirements for, 56
 Fluorimetric analysis of *Azotobacter*, 103
 Foam, control of, by electronic controller, 44
 Food, enumeration of lactose negative and positive *Enterobacteriaceae* in, 379
 Fractionation of stable sulfur isotopes by bacteria, 111
 Freeze-dried *Serratia marcescens*, recovery of viable cells of, 295
 Freeze drier, continuous, for laboratory studies, 323
 Fungi in spoiled chlortetracycline treated chicken meat, 319
- Garlic cloves, *Leuconostoc mesenteroides* in, 154
 Germfree animals, flexible film apparatus for the rearing and use of, 406
 Germicides, surfactant-iodine complexes as, 355
 Glucose, bacteriototoxicity in autoclaved culture media containing, 74
 Glucose, effect of, on bacterial assimilation of cystine, 65
 Glycerol, fermentation processes leading to, 216
 Glycerol formation in the presence of alkalis, 216
 Glycerol formation in the presence of sulfites, 197
 Glycerol formation, testing of yeast mutants for, 272
 Graeco-latin square method of multiple factor experimentation, 124
- Hard water, disinfectant activity in, 34
 Heat processing and irradiation of canned foods, 292
 Heat sterilization, calculation of time of, for fermentation media, 221
 Heat treatment of bacteria, rapid, 193
 Heterokaryons of *Aspergillus* in commercial-type fermentations, 106
Hevea Latex, comparative bacteriology of, 349
 Honey, stability of antibiotics in, 152
- IMViC coliform types, boric acid lactose broth reaction of, 396
 Irradiation and heat processing of canned foods, 292
- Lactic acid, effect of sorbic acid on, in cucumber fermentations, 373
 Lactobacilli, effect of penicillin on oral, 82
Lactobacillus fermenti, medium for assay of thiamine with, 249
 Lactose negative and positive *Enterobacteriaceae*, enumeration of, in foods, 379
Leuconostoc mesenteroides in potato tubers and garlic cloves, 154
- Mass, determining bacterial, with total phosphorus, 14
 Media, bacteriotoxic substance in autoclaved, containing glucose and phosphate, 74
 Media, calculation of heat sterilization times for fermentation, 221
 Media, effect of organic nutrients on penicillin production, 262
 Media, physical and chemical factors in preparation of silica gel, 392
 Media, synthetic, preparation of sulfur³⁵ labeled penicillin in, 149
 Medium for assay of thiamine with *Lactobacillus fermenti*, 249
 Membrane filter technique for estimating coliforms in sea water, 141
 Membrane filter technique in radiation study of spores of *Bacillus megaterium*, 61
 Membrane filter techniques, isolation of *Salmonella* with, 305
 Microbiological determination of vitamins and amino acids using dialysis cell, 160
- Microbiology, diffusion methods in analytical, 25
 Microbiology of frozen orange concentrate, 300
 Microbiology, turbidimetric methods in analytical, 235
Micrococcus pyogenes, effect of potassium on growth of, 382
Micrococcus pyogenes, influence of temperature and glucose on potassium in growth of, 382
 Microorganisms, activity of, in organic waste disposal, 166, 167, 175, 180
 Microorganisms, utilization of inorganic sulfate by rumen, 360, 363
 Mine spoils, evolution of carbon dioxide from strip, 17
 Multiple factor experimentation and biosynthetic yield of atterrimin, 124
- Nonlogarithmic rate of thermal destruction of spores of *Bacillus coagulans*, 243
 Nutrient requirements for growth of sherry flor yeast, *Saccharomyces beticus*, 56
 Nutrient requirements of wood-rotting basidiomycetes, 87
- Olives, *Propionibacterium* associated with zapatera spoilage of, 267
 Orange concentrate, enterococci in frozen, 300
 Organic compounds, streptomycin production by synthetic, 339
 Oxidation of components of soluble oils, 345
 Oxygen absorption rates in laboratory and pilot plant equipment, 313
 Oyster meats, antibiotic treatment of, 368
 Oyster meats, Clorpectin as a bactericidal wash for, 137
- Paper disc characterization of enteric pathogens, 36
 Pathogens, characterization using paper discs of enteric, 36
 Penicillin, effect of, on oral lactobacilli, 82
 Penicillin production, effect of natural materials in medium in, 262
 Penicillin, sulfur³⁵ labeled, in synthetic media, 149
 Penicillins, factors influencing production of biosynthetic, 386
 Peptones, cystine degradation and bacteriototoxicity of, 70
 Phosphate, bacteriototoxicity in autoclaved media containing, 74
 Phosphorus, determining bacterial mass with total, 14
 Physiology of wood-rotting basidiomycetes, 87
 Pilot plant and laboratory equipment, oxygen absorption rates in, 313
 1-Piperidino-2-phenyl-3-butanone hydrochloride control of citrus fruit decay, 303
 Potassium, effect of, on growth of *Micrococcus pyogenes*, 382
 Potato tubers, *Leuconostoc mesenteroides* in, 154
 Poultry meat preservation, antibiotics in, 331
 Preservation of apple juice with sorbic acid, 41
Propionibacterium associated with zapatera spoilage of olives, 267
 Putrefactive anaerobe spores, production and cleaning of, 156
- Radiation studies of *Bacillus megaterium* spores with membrane filter technique, 61
 Resistance, development of, among organisms treated with antibiotics, 331
 Respiration, factors affecting, of *Streptococcus lactis*, 281
 Rumen bacteria, ability of single strains to utilize inorganic sulfate, 363
 Rumen microorganisms and utilization of inorganic sulfate, 360, 363
- Saccharomyces beticus*, nutrient requirements for, 56
Saccharomyces cerevisiae, effect of sulfites on fermentation of, 211

- Salmonella*, isolation of, with membrane filter procedures, 305
Sea water, fermentation tube and membrane filter techniques for coliforms in, 141
Serratia marcescens, aerobic propagation of, 308
Serratia marcescens, continuous sampling of, using a slit sampler, 321
Serratia marcescens, drying conditions on survival of, 333
Serratia marcescens, rapid heat treatment of, 193
Serratia marcescens, variations in the aerial viability of, 131
Serratia marcescens, viable cells of freeze-dried, 295
Sherry flor yeast, *Saccharomyces beticus*, nutrient requirements for, 56
Silica gel media, physical and chemical factors in preparation of, 392
Slit sampler, continuous sampling of *Serratia marcescens* using a, 321
Soluble oils, oxidation of components of, 345
Sorbic acid, effect of, on yeast and lactic acid in cucumber fermentations, 373
Sorbic acid in cucumber fermentations, 373
Sorbic acid, preservation of fresh apple juice with, 41
Spoilage organisms and resistance to antibiotics, 331
Spores of *Bacillus subtilis* var. *niger*, rapid heat treatment of, 193
Spores of putrefactive anaerobe, production and cleaning of, 156
Spores, nonlogarithmic rate of thermal destruction of, of *Bacillus coagulans*, 243
Spores, radiation studies with membrane filter technique with *Bacillus megaterium*, 61
Spores, sterilization of *Bacillus subtilis* var. *niger*, 193
Stability of antibiotics in honey and sugar syrup, 152
Stability of yeasts and bacteria in suspensions, 145
Sterilization, calculation of times for, fermentation media, 221
Sterilization, effect of heat, on bacterial assimilation of cystine, 65
Sterilization of *Serratia marcescens* and spores of *Bacillus subtilis* var. *niger*, 193
Streptococcus lactis, factors affecting respiration of, 281
Streptomyces cultures, actinomycin formation by, 95
Streptomyces griseus, electron microscope study of actinophage affecting, 9
Streptomycin production stimulation by synthetic organic compounds, 339
Strip mine spoils, evolution of carbon dioxide from, 17
Sugar, effect of, on cucumber fermentation, 253
Sugar syrup, stability of antibiotics in, 152
Sulfate, utilization of inorganic, by rumen microorganisms, 360, 363
Sulfites, glycerol formation in the presence of, 197, 211
Sulfur isotopes, bacterial fractionation of, 111
Sulfur³⁵ labeled penicillin, preparation of, in synthetic media, 149
Surfactant-iodine complexes as germicides, 355
Survival, drying conditions of *Serratia marcescens* and, 333
Suspension stability of some yeasts and bacteria, 145

Temperature, effect of, on stability of antibiotics in honey and sugar syrup, 152
Thermal destruction of spores of *Bacillus coagulans*, nonlogarithmic rate of, 243
Thiamine, medium for assay of, with *Lactobacillus fermenti*, 249
Turbidimetric methods, types of, 235

Vitamins, dialysis cell determination of, 160

Waste disposal, activity of microorganisms in organic, 166, 167, 175, 180
Water, disinfectant activity in hard, 34
Wood deterioration, basic research on, 188
Wood-rotting basidiomycetes, physiology of, 87

Yeast, effect of sorbic acid on, in cucumber fermentations, 373
Yeast mutants, testing of, for glycerol formation, 272
Yeast, nutrient requirements for sherry flor, 56
Yeasts, suspension stability of, 145

Zapatera spoilage of olives associated with *Propionibacterium*, 267
