

APPLIED AND ENVIRONMENTAL MICROBIOLOGY

Volume 55

September 1989

No. 9

GENETICS AND MOLECULAR BIOLOGY

- Integration and Expression of α -Amylase and Endoglucanase Genes in the *Lactobacillus plantarum* Chromosome.** Trees Scheirlinck, Jacques Mahillon, Henk Joos, Patrick Dhaese, and Frank Michiels. 2130-2137
- Characterization of the Temperate Bacteriophage ϕ adh and Plasmid Transduction in *Lactobacillus acidophilus* ADH.** R. R. Raya, E. G. Kleeman, J. B. Luchansky, and T. R. Klaenhammer. 2206-2213
- Molecular Cloning and Expression of an *Erwinia* sp. Gene Encoding Diphenyl Ether Cleavage in *Escherichia coli*.** Hungming J. Liaw and V. R. Srinivasan. 2220-2225
- DNA-DNA Homology among Lactose- and Sucrose-Fermenting Transconjugants from *Lactococcus lactis* Strains Exhibiting Reduced Bacteriophage Sensitivity.** James L. Steele, Maeve C. Murphy, Charles Daly, and Larry L. McKay. 2410-2413
- The Conjugative Plasmid pTR2030 Encodes Two Bacteriophage Defense Mechanisms in Lactococci, Restriction Modification (R^+/M^+) and Abortive Infection (Hsp^+).** Colin Hill, Kevin Pierce, and Todd R. Klaenhammer. 2416-2419

PHYSIOLOGY AND BIOTECHNOLOGY

- Mass-Spectrometric Studies of the Interrelations among Hydrogenase, Carbon Monoxide Dehydrogenase, and Methane-Forming Activities in Pure and Mixed Cultures of *Desulfovibrio vulgaris*, *Desulfovibrio desulfuricans*, and *Methanosarcina barkeri*.** B. S. Rajagopal, P. A. Lespinat, G. Fauque, J. LeGall, and Y. M. Berlier. 2123-2129
- Continuous-Culture Responses of *Candida shehatae* to Shifts in Temperature and Aeration: Implications for Ethanol Inhibition.** M. A. Alexander, T. W. Chapman, and T. W. Jeffries. 2152-2154
- Acetate Production by Methanogenic Bacteria.** Peter Westermann, Birgitte K. Ahring, and Robert A. Mah. 2257-2261
- Modification of Lignins by Growing Cells of the Sulfate-Reducing Anaerobe *Desulfovibrio desulfuricans*.** E. Ziomek and R. E. Williams. 2262-2266
- Accumulation of the Insecticidal Crystal Protein of *Bacillus thuringiensis* subsp. *kurstaki* in Post-Exponential-Phase *Bacillus subtilis*.** John W. Crissman, Stuart C. Causey, Linda Thorne, and Thomas J. Pollock. 2302-2307
- Purification and Characterization of an Aminopeptidase from *Lactococcus lactis* subsp. *cremoris* AM2.** E. Neviani, C. Y. Boquien, V. Monnet, L. Phan Thanh, and J.-C. Gripon. 2308-2314
- Intracellular Location and O_2 Sensitivity of Uptake Hydrogenase in *Azospirillum* spp.** Changlin Fu and Roger Knowles. 2315-2319
- Glucose Metabolism and NADH Recycling by *Treponema hyodysenteriae*, the Agent of Swine Dysentery.** Thad B. Stanton. 2365-2371
- Cloning of an Endo-1,4- β -D-Glucanase Gene from *Clostridium josui* and Its Expression in *Escherichia coli*.** Kunio Ohmiya, Tsuchiyoshi Fujino, Jiraporn Sukhumavasi, and Shoichi Shimizu. 2399-2402

Continued on following page

FOOD MICROBIOLOGY

Growth of <i>Aeromonas hydrophila</i> on Fresh Vegetables Stored under a Controlled Atmosphere. M. E. Berrang, R. E. Brackett, and L. R. Beuchat	2167–2171
Sodium Lactate Delays Toxin Production by <i>Clostridium botulinum</i> in Cook-in-Bag Turkey Products. M. R. Maas, K. A. Glass, and M. P. Doyle	2226–2229
Preliminary Characterization of a Food-Borne Multiple-Antibiotic-Resistant <i>Salmonella typhimurium</i> Strain. J. D. Schuman, E. A. Zottola, and S. K. Harlander	2344–2348
Detection, Growth, and Amine-Producing Capacity of Lactobacilli in Cheese. H. M. L. J. Joosten and M. D. Northolt.	2356–2359

MYCOLOGY

Surface-Active Properties of <i>Candida albicans</i>. Stephen A. Klotz.	2119–2122
Two Distinct <i>O</i>-Methyltransferases in Aflatoxin Biosynthesis. Kimiko Yabe, Yoshiji Ando, Junji Hashimoto, and Takashi Hamasaki	2172–2177
Trichothecenes Accumulated in Liquid Culture of a Mutant of <i>Fusarium sporotrichioides</i> NRRL 3299. Ronald D. Plattner, Larry W. Tjarks, and Marian N. Beremand.	2190–2194
New Modified Trichothecenes Accumulated in Solid Culture by Mutant Strains of <i>Fusarium sporotrichioides</i>. Susan P. McCormick, Scott L. Taylor, Ronald D. Plattner, and Marian N. Beremand.	2195–2199
Physiological and Morphological Modifications in Immobilized <i>Gibberella fujikuroi</i> Mycelia. José Edmundo Nava Saucedo, Jean-Noël Barbotin, and Daniel Thomas.	2377–2384
Metabolism of Ferulic Acid by <i>Paecilomyces variotii</i> and <i>Pestalotia palmarum</i>. Mohammed Rahouti, Françoise Seigle-Murandi, Régine Steiman, and Karl-Erik Eriksson.	2391–2398

APPLIED ENVIRONMENTAL AND PUBLIC HEALTH MICROBIOLOGY

Degradation of Pentachlorophenol by Polyurethane-Immobilized <i>Flavobacterium</i> Cells. Kirk T. O'Reilly and Ronald L. Crawford	2113–2118
Biological Reductive Dechlorination of Tetrachloroethylene and Trichloroethylene to Ethylene under Methanogenic Conditions. David L. Freedman and James M. Gossett.	2144–2151
Detection of <i>Acinetobacter</i> spp. in Rural Drinking Water Supplies. Joseph M. Bifulco, James J. Shirey, and Gary K. Bissonnette	2214–2219
Disinfection of Model Indicator Organisms in a Drinking Water Pilot Plant by Using PEROXONE. Roy L. Wolfe, Mic H. Stewart, Sun Liang, and Michael J. McGuire	2230–2241
Cloning of a Gene Encoding a Major Secreted Polypeptide of <i>Listeria monocytogenes</i> and Its Potential Use as a Species-Specific Probe. Robert K. Flamm, David J. Hinrichs, and Michael F. Thomashow	2251–2256
Degradation of Acetonitrile by <i>Pseudomonas putida</i>. Mohamed S. Nawaz, Kirit D. Chapatwala, and James H. Wolfram	2267–2274
Identification of a Novel Metabolite in Phenanthrene Metabolism by the Fungus <i>Cunninghamella elegans</i>. Carl E. Cerniglia, Warren L. Campbell, James P. Freeman, and Frederick E. Evans	2275–2279

Antibiotic Resistance of Gram-Negative Enteric Bacteria from Pigs in Three Herds with Different Histories of Antibiotic Exposure. Gloria Gellin, Bruce E. Langlois, Karl A. Dawson, and Debra K. Aaron	2287–2292
Simulation of Airborne Microbial Droplet Transport. Bruce Lighthart and Jinwon Kim	2349–2355
Survey of Metal Tolerance in Moderately Halophilic Eubacteria. J. J. Nieto, R. Fernández-Castillo, M. C. Márquez, A. Ventosa, E. Quesada, and F. Ruiz-Berraquero	2385–2390
Hemagglutination and Intestinal Adherence Properties of Clinical and Environmental Isolates of Non-O1 <i>Vibrio cholerae</i>. K. Datta-Roy, C. Dasgupta, and A. C. Ghose.....	2403–2406
Biosynthesis of 130-Kilodalton Mosquito Larvicide in the Cyanobacterium <i>Agmenellum quadruplicatum</i> PR-6. Chanan Angsuthanasombat and Sakol Panyim	2428–2430

GENERAL MICROBIAL ECOLOGY

Isolation of <i>Aeromonas</i> spp. from Water by Using Anaerobic Incubation. David A. Cunliffe and Phillip Adcock	2138–2140
Bacterial Secondary Production on Vascular Plant Detritus: Relationships to Detritus Composition and Degradation Rate. Mary Ann Moran and Robert E. Hodson	2178–2189
The Cutworm <i>Peridroma saucia</i> (Lepidoptera: Noctuidae) Supports Growth and Transport of pBR322-Bearing Bacteria. John L. Armstrong, L. Arlene Porteous, and Nathan D. Wood	2200–2205
Synergism in Degradation and Utilization of Intact Forage Cellulose, Hemicellulose, and Pectin by Three Pure Cultures of Ruminal Bacteria. J. M. Osborne and B. A. Dehority	2247–2250
Mechanisms of Microbial Movement in Subsurface Materials. Patrick J. Reynolds, Pramod Sharma, Gary E. Jenneman, and Michael J. McInerney	2280–2286
Selenate Reduction to Elemental Selenium by Anaerobic Bacteria in Sediments and Culture: Biogeochemical Significance of a Novel, Sulfate-Independent Respiration. Ronald S. Oremland, James T. Hollibaugh, Ann S. Maest, Theresa S. Presser, Laurence G. Miller, and Charles W. Culbertson.....	2333–2343
Influence of Diet and Monensin on Development of Anaerobic Fungi in the Rumen, Duodenum, Cecum, and Feces of Cows. E. Grenet, G. Fonty, J. Jamot, and F. Bonnemoy.....	2360–2364
Microbiological Comparison of Surface Soil and Unsaturated Subsurface Soil from a Semiarid High Desert. Frederick S. Colwell	2420–2423
Production of 4-Methylumbelliferyl Heptanoate Hydrolase by <i>Escherichia coli</i> Exposed to Seawater. L. Fiksdal, M. Pommepuy, A. Derrien, and M. Cormier	2424–2427

METHODS

Vero Cell Assay for Rapid Detection of <i>Clostridium perfringens</i> Enterotoxin. D. E. Mahony, E. Gilliatt, S. Dawson, E. Stockdale, and S. H. S. Lee....	2141–2143
Transformation of <i>Saccharomyces cerevisiae</i> by Electroporation. Evelyne Delorme	2242–2246
Analysis of Peptide Metabolism by Ruminal Microorganisms. R. John Wallace and Nest McKain.....	2372–2376

Continued from preceding page

- Convenient Preparative Synthesis of [¹⁴C]Trehalose from [¹⁴C]Glucose by Intact *Escherichia coli* Cells.** Bettina Brand and Winfried Boos..... 2414–2415

MICROORGANISM-PLANT INTERACTIONS

- DNA Restriction Patterns and DNA-DNA Solution Hybridization Studies of *Frankia* Isolates from *Myrica pensylvanica* (Bayberry).** Raanan A. Bloom, Beth C. Mullin, and Robert L. Tate III..... 2155–2160
- Physiological, Chemical, Morphological, and Plant Infectivity Characteristics of *Frankia* Isolates from *Myrica pensylvanica*: Correlation to DNA Restriction Patterns.** Raanan A. Bloom, Mary P. Lechevalier, and Robert L. Tate III 2161–2166
- Colloidal Gold Cytochemistry of Endo-1,4- β -Glucanase, 1,4- β -D-Glucan Cellobiohydrolase, and Endo-1,4- β -Xylanase: Ultrastructure of Sound and Decayed Birch Wood.** Robert A. Blanchette, André R. Abad, Kory R. Cease, Rex E. Lovrien, and Timothy D. Leathers..... 2293–2301
- Fungal Growth Stimulation by CO₂ and Root Exudates in Vesicular-Arbuscular Mycorrhizal Symbiosis.** G. Bécard and Y. Piché..... 2320–2325
- Colonization of a Submersed Aquatic Plant, Eurasian Water Milfoil (*Myriophyllum spicatum*), by Fungi under Controlled Conditions.** Craig S. Smith, Tara Chand, Robin F. Harris, and John H. Andrews..... 2326–2332
- Epiphytic Occurrence of *Azorhizobium caulinodans* and Other Rhizobia on Host and Nonhost Legumes.** A. Adebayo, I. Watanabe, and J. K. Ladha..... 2407–2409

Date of Issue: 5 September 1989
