

APPLIED AND ENVIRONMENTAL MICROBIOLOGY

Volume 75

March 2009

No. 5

BIODEGRADATION

Anaerobic Biodegradation of *n*-Hexadecane by a Nitrate-Reducing Consortium

Amy V. Callaghan, Meghan Tierney, Craig D. Phelps, and L. Y. Young

1339–1344

BIOTECHNOLOGY

Fermentation of Barley by Using *Saccharomyces cerevisiae*: Examination of Barley as a Feedstock for Bioethanol Production and Value-Added Products

Amera Gibreel, James R. Sandercock, Jingui Lan, Laksiri A. Goonewardene, Ruurd T. Zijlstra, Jonathan M. Curtis, and David C. Bressler

1363–1372

Use of a Bacteriophage Lysin, PlyC, as an Enzyme Disinfectant against *Streptococcus equi*

J. Todd Hoopes, Caren J. Stark, Han Ah Kim, Daniel J. Sussman, David M. Donovan, and Daniel C. Nelson

1388–1394

ENVIRONMENTAL MICROBIOLOGY

Iron Requirement for Mn(II) Oxidation by *Leptothrix discophora* SS-1

Iman A. El Gheriany, Daniela Bocioaga, Anthony G. Hay, William C. Ghorse, Michael L. Shuler, and Leonard W. Lion

1229–1235

Poly-*N*-Acetylglucosamine Matrix Polysaccharide Impedes Fluid Convection and Transport of the Cationic Surfactant Cetylpyridinium Chloride through Bacterial Biofilms

Krishnaraj Ganeshnarayan, Suhagi M. Shah, Matthew R. Libera, Anthony Santostefano, and Jeffrey B. Kaplan

1308–1314

ENZYMOLGY AND PROTEIN ENGINEERING

The Unique Branching Patterns of *Deinococcus* Glycogen Branching Enzymes Are Determined by Their N-Terminal Domains

M. Palomo, S. Kralj, M. J. E. C. van der Maarel, and L. Dijkhuizen

1355–1362

Targeted Engineering of the Antibacterial Peptide Apidaecin, Based on an In Vivo Monitoring Assay System

Seichi Taguchi, Kensuke Mita, Kenta Ichinohe, and Shigeki Hashimoto

1460–1464

FOOD MICROBIOLOGY

Molecular Ecology of *Listeria monocytogenes*: Evidence for a Reservoir in Milking Equipment on a Dairy Farm

Alejandra A. Latorre, Jo Ann S. Van Kessel, Jeffrey S. Karns, Michael J. Zurakowski, Abani K. Pradhan, Ruth N. Zadoks, Kathryn J. Boor, and Ynte H. Schukken

1315–1323

Physicochemical Basis for the Inhibitory Effects of Organic and Inorganic Salts on the Growth of *Pectobacterium carotovorum* subsp. *carotovorum* and *Pectobacterium atrosepticum*

Elian-Simplice Yaganza, Russell J. Tweddell, and Joseph Arul

1465–1469

GENETICS AND MOLECULAR BIOLOGY

The Plant Phenolic Compound *p*-Coumaric Acid Represses Gene Expression in the *Dickeya dadantii* Type III Secretion System

Yan Li, Quan Peng, Dija Selimi, Qi Wang, Amy O. Charkowski, Xin Chen, and Ching-Hong Yang

1223–1228

Continued on following page

Growth-Regulated Expression of a Bacteriocin, Produced by the Sweet Potato Pathogen <i>Streptomyces ipomoeae</i>, That Exhibits Interstrain Inhibition	Jing Wang, Kevin L. Schully, and Gregg S. Pettis	1236–1242
DNA Sequencing and Homologous Expression of a Small Peptide Conferring Immunity to Gassericin A, a Circular Bacteriocin Produced by <i>Lactobacillus gasserii</i> LA39	Yasushi Kawai, Joni Kusnadi, Rober Kemperman, Jan Kok, Yoshiyuki Ito, Mikiko Endo, Kensuke Arakawa, Hideaki Uchida, Junko Nishimura, Haruki Kitazawa, and Tadao Saito	1324–1330
Construction of <i>Mycobacterium abscessus</i> Defined Glycopeptidolipid Mutants: Comparison of Genetic Tools	Halima Medjahed and Jean-Marc Reytrat	1331–1338
Characterization of a Monoclonal Antibody Directed against <i>Salmonella enterica</i> Serovar Typhimurium and Serovar [4,5,12:i:–]	A. Rementeria, A. B. Vivanco, A. Ramirez, F. L. Hernando, J. Bikandi, S. Herrera-León, A. Echeita, and J. Garaizar	1345–1354
INVERTEBRATE MICROBIOLOGY		
Tissue-Associated “<i>Candidatus</i> <i>Mycoplasma corallicola</i>” and Filamentous Bacteria on the Cold-Water Coral <i>Lophelia pertusa</i> (Scleractinia)	Sven C. Neulinger, Andrea Gärtner, Johanna Järnegren, Martin Ludvigsen, Karin Lochte, and Wolf-Christian Dullo	1437–1444
METHODS		
High-Level Diversity of Dinoflagellates in the Natural Environment, Revealed by Assessment of Mitochondrial <i>coxI</i> and <i>cob</i> Genes for Dinoflagellate DNA Barcoding	Senjie Lin, Huan Zhang, Yubo Hou, Yunyun Zhuang, and Lilibeth Miranda	1279–1290
Multilocus Sequence Typing of <i>Oenococcus oeni</i>: Detection of Two Subpopulations Shaped by Intergenic Recombination	Eric Bilhère, Patrick M. Lucas, Olivier Claisse, and Aline Lonvaud-Funel	1291–1300
Novel Cell-Based Method To Detect Shiga Toxin 2 from <i>Escherichia coli</i> O157:H7 and Inhibitors of Toxin Activity	Beatriz Quiñones, Shane Massey, Mendel Friedman, Michelle S. Swimley, and Ken Teter	1410–1416
Simultaneous Interferometric Measurement of Corrosive or Demineralizing Bacteria and Their Mineral Interfaces	M. S. Waters, M. Y. El-Naggar, L. Hsu, C. A. Sturm, A. Luttge, F. E. Udawadia, D. G. Cvitkovitch, S. D. Goodman, and K. H. Neelson	1445–1449
Simple Adhesive-Tape-Based Sampling of Tomato Surfaces Combined with Rapid Fluorescence In Situ Hybridization for <i>Salmonella</i> Detection	Bledar Bisha and Byron F. Brehm-Stecher	1450–1455
MICROBIAL ECOLOGY		
Diversity and Habitat Specificity of Free-Living Protozoa in Commercial Poultry Houses	Julie Baré, Koen Sabbe, Jeroen Van Wichelen, Ineke van Grembergh, Sofie D’hondt, and Kurt Houf	1417–1426
MYCOLOGY		
Phleomycin Increases Transformation Efficiency and Promotes Single Integrations in <i>Schizophyllum commune</i>	Arend F. van Peer, Charissa de Bekker, Arman Vinck, Han A. B. Wösten, and Luis G. Lugones	1243–1247
Telomere Organization in the Ligninolytic Basidiomycete <i>Pleurotus ostreatus</i>	Gúmer Pérez, Jasmyn Pangilinan, Antonio G. Pisabarro, and Lucía Ramírez	1427–1436

PHYSIOLOGY

- Involvement of *Shewanella oneidensis* MR-1 LuxS in Biofilm Development and Sulfur Metabolism** Deric R. Learman, Haakrho Yi, Steven D. Brown, Stanton L. Martin, Gill G. Geesey, Ann M. Stevens, and Michael F. Hochella, Jr. 1301–1307
- Oxidation of Lanthionines Renders the Lantibiotic Nisin Inactive** Shawanda Wilson-Stanford, Anastasia Kalli, Kristina Håkansson, James Kastrantas, Ravi S. Orugunty, and Leif Smith 1381–1387
- Role of the Hya Hydrogenase in Recycling of Anaerobically Produced H₂ in *Salmonella enterica* Serovar Typhimurium** Andrea L. Zbell and Robert J. Maier 1456–1459

PUBLIC HEALTH MICROBIOLOGY

- Distribution, Diversity, and Seasonality of Waterborne Salmonellae in a Rural Watershed** Bradd J. Haley, Dana J. Cole, and Erin K. Lipp 1248–1255
- Transfer Rates of Enteric Microorganisms in Recycled Water during Machine Clothes Washing** Joanne O'Toole, Martha Sinclair, and Karin Leder 1256–1263
- Continuous Presence of Noroviruses and Sapoviruses in Raw Sewage Reflects Infections among Inhabitants of Toyama, Japan (2006 to 2008)** Masae Iwai, Sumiyo Hasegawa, Mayumi Obara, Kazuya Nakamura, Eiji Horimoto, Takenori Takizawa, Takeshi Kurata, Shun-ichi Sogen, and Kimiyasu Shiraki 1264–1270
- Prevalence and Impact of Bacteriophages on the Presence of *Escherichia coli* O157:H7 in Feedlot Cattle and Their Environment** Y. D. Niu, T. A. McAllister, Y. Xu, R. P. Johnson, T. P. Stephens, and K. Stanford 1271–1278
- Associations between Antimicrobial Resistance Phenotypes, Antimicrobial Resistance Genes, and Virulence Genes of Fecal *Escherichia coli* Isolates from Healthy Grow-Finish Pigs** Leigh B. Rosengren, Cheryl L. Waldner, and Richard J. Reid-Smith 1373–1380
- Environmental Poliovirus Surveillance during Oral Poliovirus Vaccine and Inactivated Poliovirus Vaccine Use in Córdoba Province, Argentina** Judith E. Mueller, Maël Bessaud, Q. Sue Huang, Laura C. Martinez, Patricia A. Barril, Viviane Morel, Jean Balanant, Judy Bocacao, Joanne Hewitt, Brad D. Gessner, Francis Delpeyroux, and Silvia V. Nates 1395–1401
- Eukaryotic Viruses in Wastewater Samples from the United States** Erin M. Symonds, Dale W. Griffin, and Mya Breitbart 1402–1409

Cover photograph (Copyright © 2009, American Society for Microbiology. All Rights Reserved.): Measurement of *Shewanella oneidensis* MR-1 and its demineralizing calcite interface. An atomic force microscopy measurement of a single bacterium on calcite has been digitally sliced to reveal the hidden bacterium/substrate interface to convey the focus of this nondestructive imaging technology. The color bar scales height as follows: red for high and blue for low. A correlogram (an oscillating graph of raw interferometric data from a single pixel) with two distinct peaks indicates the precise three-dimensional coordinates. The red arrows connect the first peak (bacterial surface height) and second peak (calcite surface height) to their respective locations. (See related article on page 1445.)
