

APPLIED AND ENVIRONMENTAL MICROBIOLOGY

Volume 77

December 2011

No. 23

BIODEGRADATION

- Application of a Bacteriophage Lysin To Disrupt Biofilms Formed by the Animal Pathogen *Streptococcus suis*** Xiangpeng Meng, Yibo Shi, Wenhui Ji, Xueling Meng, Jing Zhang, Hengan Wang, Chengping Lu, Jianhe Sun, and Yaxian Yan 8272–8279
- Differential Degradation of Bicyclics with Aromatic and Alicyclic Rings by *Rhodococcus* sp. Strain DK17** Dockyu Kim, Miyouon Yoo, Ki Young Choi, Beom Sik Kang, Tai Kyoung Kim, Soon Gyu Hong, Gerben J. Zylstra, and Eungbin Kim 8280–8287

BIOTECHNOLOGY

- High Ethanol Titrers from Cellulose by Using Metabolically Engineered Thermophilic, Anaerobic Microbes** D. Aaron Argyros, Shital A. Tripathi, Trisha F. Barrett, Stephen R. Rogers, Lawrence F. Feinberg, Daniel G. Olson, Justine M. Foden, Bethany B. Miller, Lee R. Lynd, David A. Hogsett, and Nicky C. Caiazza 8288–8294
- Combined Effect of Improved Cell Yield and Increased Specific Productivity Enhances Recombinant Enzyme Production in Genome-Reduced *Bacillus subtilis* Strain MGB874** Kenji Manabe, Yasushi Kageyama, Takuya Morimoto, Tadahiro Ozawa, Kazuhisa Sawada, Keiji Endo, Masatoshi Tohata, Katsutoshi Ara, Katsuya Ozaki, and Naotake Ogasawara 8370–8381

ENVIRONMENTAL MICROBIOLOGY

- Field-Scale Transplantation Experiment To Investigate Structures of Soil Bacterial Communities at Pioneering Sites** Anna Lazzaro, Andreas Gauer, and Josef Zeyer 8241–8248
- Identification of Fecal Input Sites in Spring Water by Selection and Genotyping of Multiresistant *Escherichia coli*** Melanie Wicki, Fatma Karabulut, Adrian Auckenthaler, Richard Felleisen, Marcel Tanner, and Andreas Baumgartner 8427–8433
- Hemolytic Porcine Intestinal *Escherichia coli* without Virulence-Associated Genes Typical of Intestinal Pathogenic *E. coli*** Peter Schierack, Joerg Weinreich, Christa Ewers, Babila Tachu, Bryon Nicholson, and Stefanie Barth 8451–8455

ENZYMOMOLOGY AND PROTEIN ENGINEERING

- One-Pot Synthesis of Diverse DL-Configuration Dipeptides by a *Streptomyces* D-Stereospecific Amidohydrolase** Jiro Arima, Hirokazu Usuki, Tadashi Hatanaka, and Nobuhiro Mori 8209–8218
- Improvement of Glyphosate Resistance through Concurrent Mutations in Three Amino Acids of the *Ochrobactrum* 5-Enopyruvylshikimate-3-Phosphate Synthase** Yong-Sheng Tian, Jing Xu, Ai-Sheng Xiong, Wei Zhao, Xiao-Yan Fu, Ri-He Peng, and Quan-Hong Yao 8409–8414

Continued on following page

EVOLUTIONARY AND GENOMIC MICROBIOLOGY

- Genome and Proteome of *Campylobacter jejuni* Bacteriophage NCTC 12673** Andrew M. Kropinski, Denis Arutyunov, Mary Foss, Anna Cunningham, Wen Ding, Amit Singh, Andrey R. Pavlov, Matthew Henry, Stephane Evoy, John Kelly, and Christine M. Szymanski 8265–8271
- Ruminant Rhombencephalitis-Associated *Listeria monocytogenes* Alleles Linked to a Multilocus Variable-Number Tandem-Repeat Analysis Complex** Lina Balandyté, Isabelle Brodard, Joachim Frey, Anna Oevermann, and Carlos Abril 8325–8335
- Influence of Host Phylogeographic Patterns and Incomplete Lineage Sorting on Within-Species Genetic Variability in *Wigglesworthia* Species, Obligate Symbionts of Tsetse Flies** Rebecca E. Symula, Ian Marpur, Robert D. Bjornson, Loyce Okedi, Jon Beadell, Uzma Alam, Serap Aksoy, and Adalgisa Caccone 8400–8408

FOOD MICROBIOLOGY

- Use of a DNA Microarray for Detection and Identification of Bacterial Pathogens Associated with Fishery Products** Boyang Cao, Rongrong Li, Songjin Xiong, Fangfang Yao, Xiangqian Liu, Min Wang, Lu Feng, and Lei Wang 8219–8225
- Induction of Viable but Nonculturable *Escherichia coli* O157:H7 in the Phyllosphere of Lettuce: a Food Safety Risk Factor** Laura-Dorina Dinu and Susan Bach 8295–8302
- Hemocytes Are Sites of Enteric Virus Persistence within Oysters** Keleigh Provost, Brooke A. Dancho, Gulnihal Ozbay, Robert S. Anderson, Gary P. Richards, and David H. Kingsley 8360–8369
- Survival and Heat Resistance of *Salmonella enterica* and *Escherichia coli* O157:H7 in Peanut Butter** Yingshu He, Dongjing Guo, Jingyun Yang, Mary Lou Tortorello, and Wei Zhang 8434–8438
- Competitive Selection of Lactic Acid Bacteria That Persist in the Human Oral Cavity** Johannes Snel, Maria L. Marco, Fedde Kingma, Wouter M. Noordman, Jan Rademaker, and Michiel Kleerebezem 8445–8450

GENETICS AND MOLECULAR BIOLOGY

- Mutations Suppressing the Loss of DegQ Function in *Bacillus subtilis* (natto) Poly- γ -Glutamate Synthesis** Thi-Huyen Do, Yuki Suzuki, Naoki Abe, Jun Kaneko, Yoshifumi Itoh, and Keitarou Kimura 8249–8258
- Gamma-Butyrolactone Regulatory System of *Streptomyces chattanoogensis* Links Nutrient Utilization, Metabolism, and Development** Yi-Ling Du, Xue-Ling Shen, Pin Yu, Lin-Quan Bai, and Yong-Quan Li 8415–8426

GEOMICROBIOLOGY

- Significance of Microbial Communities and Interactions in Safeguarding Reactive Mine Tailings by Ecological Engineering** Ivan Ñancucheo and D. Barrie Johnson 8201–8208

INVERTEBRATE MICROBIOLOGY

- Bacterial Communities of Two Parthenogenetic Aphid Species Cocolonizing Two Host Plants across the Hawaiian Islands** Ryan T. Jones, Alberto Bressan, April M. Greenwell, and Noah Fierer 8345–8349

METHODS

- Imaging and Analysis of *Pseudomonas aeruginosa* Swarming and Rhamnolipid Production** Joshua D. Morris, Jessica L. Hewitt, Lawrence G. Wolfe, Nachiket G. Kamatkar, Sarah M. Chapman, Justin M. Diener, Andrew J. Courtney, W. Matthew Leevy, and Joshua D. Shrout 8310–8317
- Development and Characterization of a Xylose-Inducible Gene Expression System for *Clostridium perfringens*** Hirofumi Nariya, Shigeru Miyata, Tomomi Kuwahara, and Akinobu Okabe 8439–8441
- Method Enabling Gene Expression Studies of Pathogens in a Complex Food Matrix** Jette Kjeldgaard, Sidsel Henriksen, Marianne Thorup Cohn, Søren Aabo, and Hanne Ingmer 8456–8458

MYCOLOGY

- Endo- β -1,3-Glucanase GLU1, from the Fruiting Body of *Lentinula edodes*, Belongs to a New Glycoside Hydrolase Family** Yuichi Sakamoto, Keiko Nakade, and Naotake Konno 8350–8354

PHYSIOLOGY

- Pyruvate and Lactate Metabolism by *Shewanella oneidensis* MR-1 under Fermentation, Oxygen Limitation, and Fumarate Respiration Conditions** Grigoriy E. Pinchuk, Oleg V. Geydebrekht, Eric A. Hill, Jennifer L. Reed, Allan E. Konopka, Alexander S. Beliaev, and Jim K. Fredrickson 8234–8240

PLANT MICROBIOLOGY

- The Dent Stage of Maize Kernels Is the Most Conducive for Fumonisin Biosynthesis under Field Conditions** Adeline Picot, Christian Barreau, Laëtitia Pinson-Gadais, François Piraux, Daniel Caron, Christian Lannou, and Florence Richard-Forget 8382–8390

PUBLIC HEALTH MICROBIOLOGY

- Characterization and Quantitation of a Novel β -Lactamase Gene Found in a Wastewater Treatment Facility and the Surrounding Coastal Ecosystem** Miguel I. Uyaguari, Erin B. Fichot, Geoffrey I. Scott, and R. Sean Norman 8226–8233
- Subtilase Cytotoxin-Coding Genes in Verotoxin-Producing *Escherichia coli* Strains from Sheep and Goats Differ from Those from Cattle** José A. Orden, Pilar Horcajo, Ricardo de la Fuente, José A. Ruiz-Santa-Quiteria, Gustavo Domínguez-Bernal, and Javier Carrión 8259–8264
- Characterization of the Poly- β -1,6-*N*-Acetylglucosamine Polysaccharide Component of *Burkholderia* Biofilms** Nandadeva Yakandawala, Purushottam V. Gawande, Karen LoVetri, Silvia T. Cardona, Tony Romeo, Mark Nitz, and Srinivasa Madhyastha 8303–8309
- Mother-to-Child Transmission of and Multiple-Strain Colonization by *Bacteroides fragilis* in a Cohort of Mothers and Their Children** G. A. Bjerke, R. Wilson, O. Storrø, T. Øyen, R. Johnsen, and K. Rudi 8318–8324
- In Vitro* Fermentation of Sugar Beet Arabino-Oligosaccharides by Fecal Microbiota Obtained from Patients with Ulcerative Colitis To Selectively Stimulate the Growth of *Bifidobacterium* spp. and *Lactobacillus* spp.** Louise Kristine Vignæs, Jesper Holck, Anne S. Meyer, and Tine Rask Licht 8336–8344
- National Validation Study of a Cellulose Sponge Wipe-Processing Method for Use after Sampling *Bacillus anthracis* Spores from Surfaces** Laura J. Rose, Lisa Hodges, Heather O'Connell, and Judith Noble-Wang 8355–8359

Continued from preceding page

**Fimbrial Adhesins Produced by Atypical Enteropathogenic
Escherichia coli Strains**

Rodrigo T. Hernandez, Irina
Velsko, Suely C. F. Sampaio, Waldir
P. Elias, Roy M. Robins-Browne,
Tânia A. T. Gomes, and Jorge A.
Girón

8391–8399

**DNA Detection and Genotypic Identification of Potentially
Human-Pathogenic Microsporidia from Asymptomatic Pet
Parrots in South Korea as a Risk Factor for Zoonotic
Emergence**

So-Young Lee, Sung-Seok Lee,
Young S. Lyoo, and Hee-Myung
Park

8442–8444

Cover photograph (Copyright © 2011, American Society for Microbiology. All Rights Reserved.): Dual-strain swarming motility time-lapse experiment for *Pseudomonas aeruginosa* (colored green, imaged by fluorescence of green fluorescent protein [GFP]) and *Salmonella enterica* serovar Typhimurium (colored red, imaged by bioluminescence). While *S. Typhimurium* covers the plate first, *P. aeruginosa* dominates over time. (See related article on page 8310.)
