Articles of Significant Interest Selected from This Issue by the Editors	2885
--	------

BIOTECHNOLOGY

Application of a <i>Euryarchaeota</i> -Specific Helicase from <i>Thermococcus kodakarensis</i> for Noise Reduction in PCR	Ayako Fujiwara, Katsuhiko Kawato, Saori Kato, Kiyoshi Yasukawa, Ryota Hidese, Shinsuke Fujiwara	3022–3031
Overproduction of Magnetosomes by Genomic Amplification of Biosynthesis-Related Gene Clusters in a Magnetotactic Bacterium	Anna Lohße, Isabel Kolinko, Oliver Raschdorf, René Uebe, Sarah Borg, Andreas Brachmann, Jürgen M. Plitzko, Rolf Müller, Youming Zhang, Dirk Schüler	3032–3041
Soybean Ferritin Expression in <i>Saccharomyces cerevisiae</i> Modulates Iron Accumulation and Resistance to Elevated Iron Concentrations	Rosa de Llanos, Carlos Andrés Martínez-Garay, Josep Fita-Torró, Antonia María Romero, María Teresa Martínez-Pastor, Sergi Puig	3052–3060
Inactivation of <i>Acanthamoeba</i> spp. and Other Ocular Pathogens by Application of Cold Atmospheric Gas Plasma	Wayne Heaselgrave, Gilbert Shama, Peter W. Andrew, Michael G. Kong	3143–3148

ENVIRONMENTAL MICROBIOLOGY

<i>In Situ</i> Biomineralization and Particle Deposition Distinctively Mediate Biofilm Susceptibility to Chlorine	Xiaobao Li, David L. Chopp, William A. Russin, Paul T. Brannon, Matthew R. Parsek, Aaron I. Packman	2886–2892
Mycelium-Like Networks Increase Bacterial Dispersal, Growth, and Biodegradation in a Model Ecosystem at Various Water Potentials	Anja Worrlich, Sara König, Anja Miltner, Thomas Banitz, Florian Centler, Karin Frank, Martin Thullner, Hauke Harms, Matthias Kästner, Lukas Y. Wick	2902–2908

EVOLUTIONARY AND GENOMIC MICROBIOLOGY

Isolation and Complete Genome Sequence of <i>Algibacter alginolytica</i> sp. nov., a Novel Seaweed-Degrading <i>Bacteroidetes</i> Bacterium with Diverse Putative Polysaccharide Utilization Loci	Cong Sun, Ge-yi Fu, Chong-ya Zhang, Jing Hu, Lin Xu, Rui-jun Wang, Yue Su, Shuai-bo Han, Xiao-yun Yu, Hong Cheng, Xin-qi Zhang, Ying-yi Huo, Xue-wei Xu, Min Wu	2975–2987
---	---	-----------

FOOD MICROBIOLOGY

Influence of Low-Shear Modeled Microgravity on Heat Resistance, Membrane Fatty Acid Composition, and Heat Stress-Related Gene Expression in <i>Escherichia coli</i> O157:H7 ATCC 35150, ATCC 43889, ATCC 43890, and ATCC 43895	H. W. Kim, M. S. Rhee	2893–2901
Transcriptional Profile during Deoxycholate-Induced Sporulation in a <i>Clostridium perfringens</i> Isolate Causing Foodborne Illness	Mayo Yasugi, Daisuke Okuzaki, Ritsuko Kuwana, Hiromu Takamatsu, Masaya Fujita, Mahfuzur R. Sarker, Masami Miyake	2929–2942
Recognition of Histo-Blood Group Antigen-Like Carbohydrates in Lettuce by Human GII.4 Norovirus	Xiang Gao, Malak A. Esseili, Zhongyan Lu, Linda J. Saif, Qiuhong Wang	2966–2974
Construction of Nontoxigenic Mutants of Nonproteolytic <i>Clostridium botulinum</i> NCTC 11219 by Insertional Mutagenesis and Gene Replacement	Charlien Clauwers, Kristof Vanoirbeek, Laurence Delbrassinne, Chris W. Michiels	3100–3108

Environmental Metabolomics of the Tomato Plant Surface Provides Insights on <i>Salmonella enterica</i> Colonization	Sanghyun Han, Shirley A. Micallef	3131–3142
GENETICS AND MOLECULAR BIOLOGY		
Development of a Real-Time PCR for a Sensitive One-Step Coprodiagnosis Allowing both the Identification of Carnivore Feces and the Detection of <i>Toxocara</i> spp. and <i>Echinococcus multilocularis</i>	Jenny Knapp, Gérald Umhang, Marie-Lazarine Poulle, Laurence Millon	2950–2958
The <i>apt/6</i> -Methylpurine Counterselection System and Its Applications in Genetic Studies of the Hyperthermophilic Archaeon <i>Sulfolobus islandicus</i>	Changyi Zhang, Qunxin She, Hongkai Bi, Rachel J. Whitaker	3070–3081
Vacuolar H ⁺ -ATPase Protects <i>Saccharomyces cerevisiae</i> Cells against Ethanol-Induced Oxidative and Cell Wall Stresses	Sirikarn Charoenbhakdi, Thanittra Dokpikul, Thanawat Burphan, Todsapol Techo, Choowong Auesukaree	3121–3130
GEOMICROBIOLOGY		
Biological Low-pH Mn(II) Oxidation in a Manganese Deposit Influenced by Metal-Rich Groundwater	Tsing Bohu, Denise M. Akob, Michael Abratis, Cassandre S. Lazar, Kirsten Küsel	3009–3021
INVERTEBRATE MICROBIOLOGY		
Intraspecific Competition Impacts <i>Vibrio fischeri</i> Strain Diversity during Initial Colonization of the Squid Light Organ	Yan Sun, Elijah D. LaSota, Andrew G. Cecere, Kyle B. LaPenna, Jessie Larios-Valencia, Michael S. Wollenberg, Tim Miyashiro	3082–3091
<i>Wolbachia</i> Modulates Lipid Metabolism in <i>Aedes albopictus</i> Mosquito Cells	Jennifer C. Molloy, Ulf Sommer, Mark R. Viant, Steven P. Sinkins	3109–3120
METHODS		
Detection and Diversity of Fungal Nitric Oxide Reductase Genes (<i>p450nor</i>) in Agricultural Soils	Steven A. Higgins, Allana Welsh, Luis H. Orellana, Konstantinos T. Konstantinidis, Joanne C. Chee-Sanford, Robert A. Sanford, Christopher W. Schadt, Frank E. Löffler	2919–2928
Nanomechanical Characterization of <i>Bacillus anthracis</i> Spores by Atomic Force Microscopy	Alex G. Li, Larry W. Burggraf, Yun Xing	2988–2999
Complementation of Arginine Auxotrophy for Genetic Transformation of <i>Coxiella burnetii</i> by Use of a Defined Axenic Medium	Kelsi M. Sandoz, Paul A. Beare, Diane C. Cockrell, Robert A. Heinzen	3042–3051
MICROBIAL ECOLOGY		
Cellar-Associated <i>Saccharomyces cerevisiae</i> Population Structure Revealed High-Level Diversity and Perennial Persistence at Sauternes Wine Estates	Marine Börlin, Pauline Venet, Olivier Claisse, Franck Salin, Jean-Luc Legras, Isabelle Masneuf-Pomarede	2909–2918
Comparative Single-Cell Genomics of <i>Chloroflexi</i> from the Okinawa Trough Deep-Subsurface Biosphere	Heather Fullerton, Craig L. Moyer	3000–3008
PLANT MICROBIOLOGY		
Isolation of Endohyphal Bacteria from Foliar Ascomycota and <i>In Vitro</i> Establishment of Their Symbiotic Associations	Kayla R. Arendt, Kevin L. Hockett, Sarah J. Araldi-Brondolo, David A. Baltrus, A. Elizabeth Arnold	2943–2949

PUBLIC AND ENVIRONMENTAL HEALTH
MICROBIOLOGY

- | | | |
|--|---|-----------|
| Control of <i>Legionella</i> Contamination and Risk of Corrosion in Hospital Water Networks following Various Disinfection Procedures | Isabella Marchesi, Greta Ferranti, Antonella Mansi, Anna M. Marcelloni, Anna R. Proietto, Navneet Saini, Paola Borella, Annalisa Bargellini | 2959–2965 |
| Kinetics of Inactivation of <i>Bacillus subtilis</i> subsp. <i>niger</i> Spores and <i>Staphylococcus albus</i> on Paper by Chlorine Dioxide Gas in an Enclosed Space | Tao Wang, Jinhui Wu, Jiancheng Qi, Limei Hao, Ying Yi, Zongxing Zhang | 3061–3069 |
| Differences in the Vulnerability of Waterbird Species to Botulism Outbreaks in Mediterranean Wetlands: an Assessment of Ecological and Physiological Factors | I. Anza, D. Vidal, J. Feliu, E. Crespo, R. Mateo | 3092–3099 |

Cover photograph (Copyright © 2016, American Society for Microbiology. All Rights Reserved.): Variation in fruit surface metabolite and exudate profiles among tomato cultivars affected *Salmonella enterica* population growth. This variation may partially explain the differential susceptibility of tomato cultivars to epiphytic colonization by *Salmonella enterica*. The fruit of a selection of cultivars are shown as follows: 'Heinz-1706' (top left), 'Florida 91 VFF' (top middle), 'Plum Dandy VF' (top right), 'Moneymaker' (middle left), 'Micro-Tom' (middle), 'Rutgers Select' (middle right), 'Nyagous' (bottom left), 'Virginia Sweets' (bottom middle), and 'California Red Cherry' (bottom right). (See related article on page 3131.)
