### COVER IMAGE

*Cover photograph:* An image conveying the concept that bacteria can benefit their host by adapting to its diet. The artwork is by Maria Elena Martino (University of Padua, Padua, Italy) and is based on her talk at the 7th Conference on Beneficial Microbes. A review of that meeting, along with articles and minireviews from presenters at that meeting, is included in this issue. (See related article at e00497-19.)
