### COVER IMAGE

*Cover photograph:* Newly hatched rainbow trout sac fry, each with an orange yolk sac, swim among discarded eggshells at the National Center for Cool and Cold Water Aquaculture (NCCCWA), in Leetown, WV. Rainbow trout and other salmonids are susceptible to bacterial cold-water disease caused by *Flavobacterium psychrophilum*. Genetic analyses are beginning to identify critical virulence factors responsible for this disease. (Photograph by Stephen Ausmus, USDA-ARS.) (See related article at e00799-20.)
